

Kuol Akech Riak Kuol

Web Developer & Digital Communications Specialist

Kigali, Rwanda · k.kuol@alustudent.com · linkedin.com/in/kuol-akech · github.com/k-kuol

SUMMARY

Web Developer and Digital Communications Specialist who ships full products, not just code — architecting databases, building interfaces, and pairing them with the brand systems and writing that make people trust what they're using. Proven across six African countries: platforms that manage real land and identity data, communications strategy for a multi-country organization, and mentorship programs that turn frameworks into results. Currently completing a Software Engineering degree at the African Leadership University while actively delivering for clients and communities across the continent.

EDUCATIONAL BACKGROUND

African Leadership University — Kigali, Rwanda
Undergraduate Student, Software Engineering

September 2025 – Present

PROFESSIONAL WORK EXPERIENCE

Peacepedia-Africa

April 2026 – Present

Communications Officer — Juba, South Sudan · Kigali, Rwanda · Nairobi, Kenya · Bujumbura, Burundi · Adjumani, Uganda · Banjul, Gambia

- ▶ Adapt the same underlying message for different audiences across multiple countries.
- ▶ Exercise judgment on what to simplify and what to leave alone in every piece of communication.
- ▶ Maintain a consistent organizational voice across country contexts.

Wong Amit Diary

August 2026 – Present

Social Media Manager — Sherikat, Juba, South Sudan

- ▶ Plan and write captions that sound like a person, not a brand account.
- ▶ Keep the voice consistent across quick updates and longer, more considered posts.
- ▶ Prioritize post quality over posting frequency — publishing only what's worth someone's time.

Spark Foundation South Sudan

November 2025 – May 2026

Mentor — Juba Airport Road, Juba, South Sudan

- ▶ Led one-on-one mentoring conversations tailored to each student's week.
- ▶ Translated structured curriculum frameworks into practical, personal guidance.
- ▶ Focused on the follow-up conversations where the real mentoring impact happened.

KEY PROJECTS

TerraTrust Foundation — Full-stack land-documentation platform

Designed and built the whole system myself: Django, PostGIS, React, and React Native, with a database architected so identity and location data stay separate, an offline-capable app, a dashboard, and a public map.

DreamReach — Scholarship & internship discovery platform

Built a search tool that pulls live listings via the Remoteive API alongside a hand-curated scholarship list, replacing a search that used to be scattered across a dozen sites.

EXTRACURRICULAR ACTIVITIES

Creative Writing & Poetry

Write poetry rooted in personal history, including the experience of leaving South Sudan at nine during the war, and have presented published creative work to colleagues and peers.

SKILLS

Development

React & Django SQL & PostGIS
Database & Systems Architecture
